## 1. Product description:

DSN28369 is a heterobifunctional linker, and useful to make antibody drug conjugate (ADC). DSN28369 contains a carboxy group, which can react with amino group or hydroxy group after activation. DSN28369 also contains a maleimido group, which can react with surfuryl group. This product has no formal name at the moment. For the convenience of communication, a temporary code name was therefore proposed according to MedKoo Chemical Nomenclature (see web page: <https://www.medkoo.com/page/naming>).

## 2. CoA, QC data, SDS, and handling instruction

SDS and handling instruction, CoA with copies of QC data (NMR, HPLC and MS analytical spectra) can be downloaded from the product web page under “QC And Documents” section. Note: copies of analytical spectra may not be available if the product is being supplied by MedKoo partners. Whether the product was made by MedKoo or provided by its partners, the quality is 100% guaranteed.
